

SUMMARY

Director of R&D with 17+ years of experience in product development, including 7 years leading cross-functional teams. Proven track record of launching new products, enhancing R&D capabilities, and delivering cutting-edge solutions. My experience working as both a **product manager** and a **full-stack developer**, uniquely positions me to understand and address both the technical and strategic aspects of product development.

KEY SKILLS

MicroServices Development: Java - Spring - Docker - ElasticSearch - Kafka - AWS Services - Angular - Ag-grid - SQL (Oracle, MySQL) - NoSQL (MongoDB) - Netflix OSS - DevOps practices - Continuous Integration

Data Science: Acquiring proficiency in: Python - Pandas - NumPy - Matplotlib - Scikit-learn

Architecture Skills: Solution Design - MicroServices - Event-Driven Architecture - Database Design

Product Management: Design thinking - Product Strategy - Requirement Gathering and Prioritization - UX Design

Technology Leadership: Strategic Vision & Planning - Effective Communication - Decision-Making - Adaptability - Value Stream Mapping - Continuous Improvement - Cross-Functional Collaboration - Agile Development Processes

PROFESSIONAL EXPERIENCE

- Director of Engineering

May 2023 - Present

Operative

Bangalore

 - Created proposal enabling product managers to **renegotiate a client contract**, achieving around 25% reduction in development cost
 - Led the implementation of **4 customer go-lives**, across **3 verticals** in a span of 7 months, ensuring smooth delivery and deployment of AOS services
 - Led org-level DevOps initiatives to enhance **CI/CD automation** and streamline software delivery processes, which brought down manual deployment activities to near zero
 - Formulated a **comprehensive design proposal** for managing converged roadmap requirements across verticals, optimizing execution, resolving conflicts, & redundant implementation
 - Leading a **multidisciplinary team** comprising 60 engineers, across Bangalore, Pune, Romania, Jerusalem, and the US, overseeing comprehensive end-to-end planning and execution
- Associate Director

Dec 2021 - Apr 2023

Operative

Bangalore

 - Organized an **org-wide hackathon**, enabling the completion of proof of concepts for 80% of the Deployment Automation and other tooling backlog
 - Trained freshers within 6 months, to replace contract positions, resulting in reduced costs and improved **operational efficiency**
 - Defined proposal to **redefine UX**, for complex workspace implementation, effectively reducing development cost & improving quality
 - Drove initiatives to improve Rest Assured based API automation by modernizing outdated test cases, enhancing using **data-driven testing**, resulting in a substantial boost in testing effectiveness
 - Designed training and peer-mentoring programs, to tackle inefficiencies in **sprint sanity**, team disconnect, & collaboration gaps
- Sr. Software Development Manager

Mar 2020 - Nov 2021

Operative

Bangalore

 - Pioneered the implementation of a **Kafka stream-based** application as a **solution architect**, establishing a reference standard for future implementations across the organization
 - Developed a plug-and-play migration framework using Java, featuring reusable functionalities for **traceability, re-run, & audit**, leading to a 100% migration predictability
 - Improved the **CI pipeline**, resulting in an 80% reduction in manual work post-branch cut & enhancing static code quality & unit test coverage
 - Restructured **backlog grooming** and **functional JADs**, enhancing the predictability of sprint/release adoptions and preempting late identification of functional gaps and requirements
- Principal Software Engineer

Nov 2016 - Feb 2020

Operative

Bangalore

- Transitioned to full-time UI developer and revamped UI service classes, increasing unit test coverage from 30% to 60% and improving code maintenance - Introduced Ag-Grid as an alternative to tackle performance & maintenance hurdles in operations, resulting in resolution of performance & maintenance challenges - Enhanced system efficiency through optimizing of data models & API refactoring efforts for multiple microservice teams, resulting in improved user response times - Mentored backend and UI developers, elevating code quality and maintenance through consistent use of coding standards and design patterns	Oct 2014 - Sep 2016
Sr.Product Analyst	
MetricStream	Bangalore

Worked as a Product Manager

- Redesigned the data modeller tool by refining entity relationships, resulting in **decrease** in the need for **custom code by 70%**, thus expediting upgrades & new implementations
- Transformed the entire workflow designer into a low-code solution, expanding its usability to address a wider array of use cases through **intuitive drag-and-drop functionalities**, resulting in 100% adoption among the product team
- Initiated the integration of A/B Testing for usability testing practices, commencing with the new dashboard design to ensure an **intuitive user experience**

Senior Member Of Technical Staff	Oct 2012 - Sep 2014
MetricStream	Bangalore
Sr.Software Engineer	Jul 2011 - Oct 2012
Huawei Technologies India Pvt Ltd	Bangalore
Sr.Project Engineer	Mar 2010 - Jul 2011
Wipro Technologies	Chennai
Sr.Software Engineer	May 2007 - Feb 2010
Sirahu Technologies	Chennai

EDUCATION

Executive PG Programme - AI & ML	Oct 2023 - Nov 2024
IIIT - B	
<i>Machine Learning - Deep Learning - NLP - Generative AI</i>	
Executive Education	Oct 2020 - Dec 2020
Columbia University	
<i>Leadership Essentials - Developing and Leading High-Performing Teams - Driving Strategic Impact</i>	
B Tech - Information Technology	Jul 2001 - Apr 2005
RVS - Anna University	

ADDITIONAL INFORMATION / VOLUNTEERING EXPERIENCE

- Conducting a **Book Club** at Operative focused on self-help books, aimed at **fostering personal growth and professional development** among employees
- Volunteered with the **NGO CRY** for several years, focused on raising awareness about education among children in slum areas
