SUMMARY

Results-oriented Sr. Engineering Specialist with over plus decade experience in DevSecOps, SRE, MLOps, and AIOps. Skilled in designing and implementing robust platforms, end-to-end CI-CD-CT pipelines, and integrating AI models across cloud and on-prem infrastructures to drive seamless operations. Adept at leveraging a wide array of technical skills to optimize efficiency, reduce downtime, and enhance system performance

PROFESSIONAL EXPERIENCE

BT Group

Nov '22 - Present

Design Engineering Specialist (DevSecOps/AI/ML)

Bangalore, India

Products: ARCAM, IIP-MS

- Spearheaded **ARCAM**, an in-house Kubernetes platform across **AWS**, GCP, and VMware Tanzu, **enabling \$100K/year savings**, 50% faster deployments, and 30% efficiency gains
- Engineered IaC with Crossplane, ACK Controllers, and GitLab CI/CD, driving **30% efficiency** boost and reducing errors through automation.
- Involved in building **in-house AMA chatbot** with AWS **Bedrock**, and **SageMakerAI**, reducing on-boarding team size from 100 to 15.
- Implemented GitOps workflows with **ArgoCD + Kubernetes**, ensuring **zero downtime** and seamless infra management.
- Enhanced platform security by integrating CertManager, Entra ID, and policy enforcement, improving **compliance by 25%**.
- Delivered full-stack observability via **Dynatrace**, Prometheus, Grafana, Kiali, and Apigee, boosting monitoring **efficiency by 20%**.
- Automated scaling using KEDA, **Karpenter**, and Cluster Autoscaler, optimizing workload **efficiency by 40%**.
- **Negotiated vendor contracts**, cutting cloud/tool costs by 50% through strategic cost-benefit analysis and competitive bidding.
- Automated ML workflows with **Kubeflow** Pipelines + Kubernetes, streamlining model deployment across Vertex AI, **MLFlow** and TensorFlow.
- **Drove 300K GBP** annual savings by building in-house QA & SRE teams, reducing partner dependency by 50%, while leading a 20-member team.
- Cut **CAPEX/OPEX by 300K GBP** via efficient resource allocation, process optimization, and innovative practices.
- Boosted code efficiency by 40% and cut costs by 20% through in-house GenAI tools (utilizing Amazon Q, copilot, GPT, Claude models).
- **Containerized automation frameworks**, integrating with GitLab pipelines, reducing deployment time by 15 hours.
- Strengthened FinOps practices using CloudHealth, Apttio Cloudability, and AWS Budgets, achieving \$40M cost savings.
- Demonstrated strong Partner/Vendor Management, Team Handling, and **Merger & Acquisitions expertise**, improving client satisfaction by 30%.
- Built and maintained scalable **data pipelines** using AWS Glue, S3, Lambda, Step Functions, and **Athena**, with **Deequ** for automated data quality checks and validation. Deployed and managed ML models on AWS **SageMaker**, enabling **end-to-end MLOps** workflows including training, versioning, and inference automation.
- Contributed to GenAI/LLM initiatives using AWS **Bedrock**, applied Amazon **Macie** for data security and PII detection, and gained hands-on experience in model development fundamentals (feature engineering, training, evaluation).

Nokia Solutions Networks

Feb '17 - Oct '22

Sr. Technical Specialist - DevSecOps | SRE

Bangalore, India

Products: FlowOne Fulfillment, NoRC, NAC, Catalog

- Spearheaded NDOC product development using Docker, Kubernetes, Helm on NCS & OCP, doubling application deployment velocity
- Designed Jenkins pipelines (Groovy), Helm charts, Terraform templates, and Azure DevOps (YAML) pipelines for cloud migration & CI/CD, achieving 30% higher efficiency and 50% faster deployments
- Optimized cluster performance by 30% and automated deployments by 50% using NCS/OCP/AKS, Helm, Docker; implemented Blue-Green, Rolling & Canary Deployments for telecom apps
- Automated deployments with Ansible, integrated Maven & JFrog Artifactory, and improved production quality using SonarQube & Fortify scans.
- Enhanced **DelOps (Delivery Ops)** with AWS services; configured CloudWatch Alerts, and standardized logging with Log4j
- Delivered 30% cost savings, 3x scalability boost, and 20% operational efficiency improvements across platforms.

Evolving Systems

Apr '13 - Jan '17

Technical Lead - SDET

Bangalore, India

Products: Terto, FUR (First User Registration), Orchestration and Fulfillment, WRA

- Automated (DSA) FUR-Proxy HLR via SS7-Sigtran Stack, utilizing MAP, TCAP, SCCP and MTP interfaces to minimize errors in allocation
- Involved in Testing LTE FUR-Proxy HSS with 4G/LTE scenarios of Network attach procedures with Diameter (s6a, s6d, s13) using Seagull and
- Functional Testing of MME (s1ap) using scripts-based testing. (3GPP TS 29.272 Rel: 9)

Huawei Technologies

Feb '10 - Mar '13

SDET - II

Bangalore, India

Products: Dynamic Discount System, Dynamic Tariff, Charging System (OCS/OFCs)

- Implemented automation of the DT Product for 20 Major Versions, integrating interfaces with IN/OCS/Billing systems, CRM utilizing XML, SOAP,

- REST, BSC, BTS, SMSC, Discount Delivery to IN, Discount Broadcast via CBC, etc
- Designed Automation Hybrid Framework using Selenium-Java (SmartGUI) and composed 1000 plus Test cases

INTERNSHIPS	
ENIL - Radio Mirchi	Jan '09 - Jan '10
IT Trainee	Bangalore, India
Product: RCS (Radio Computing Services)	

PROJECTS	
Non-Profit Technical Consultant (Pro Bono)	May '25 - Present
Freelance Project @ Start-up NGO	Bangalore, India
• Currently assisting an Organization (Startup NGO) in their transformation journey from 100% manual operations to fully automated systems, driving significant efficiency and cost savings (approx. 20 manpower reduction). • Providing strategic direction on tools, design, and frameworks to help the company achieve sustainable automation and long-term scalability. • Contributed to model development and experimentation with Agglomerative Clustering, leveraging distance-based linkage methods and feature scaling techniques (StandardScaler, MinMaxScaler) to enhance cluster quality and interpretability.	

KEY SKILLS	
• Programming & Scripting: Python (NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn, OOPs), Shell Scripting, PL/SQL • Data Analytics & Integration: Power BI, SQL Server, MLflow, Kubeflow, Apache Airflow, dbt (Data Build Tool) • AI / ML Models: Linear & Logistic Regression, Decision Trees, Random Forest, XGBoost, Naïve Bayes, K-Means Clustering, PCA, Neural Networks (CNN, RNN, Transformers), NLP (Topic Modeling, Sentiment Analysis, Text Classification) • AI / ML Frameworks & Tools: TensorFlow, PyTorch, Hugging Face Transformers, LangChain, Vector Databases (FAISS, Weaviate), OpenAI APIs • DevOps & MLOps Tools: Docker, Kubernetes, Helm, Ansible, Terraform, Istio, Karpenter, KEDA, Prometheus, Grafana, Dynatrace, Linux • Cloud Platforms: AWS: Bedrock, SageMakerAI, EKS, Comprehend, Glue, Redshift, Athena, S3, Lambda, ECR, ECS, Fargate Azure: OpenAI Services, AI Foundry, Azure Machine Learning, Cognitive Services • Testing Tools: JMeter, BlazeMeter, Selenium GRID, PyTest, JUnit, TestNG, Robot Framework, Postman, Valgrind, GDB, Mem-Monitor, Seagull • Security Tools: SAST (Sonar, Checkmarx), DAST (OWASP ZAP, Burp Suite), Black Duck, Container Security (Aqua Security, Prisma/Twistlock, Clair, Trivy)	

EDUCATION	
Post Graduate in Machine Learning & AI (Executive), IIIT Bangalore	Apr '24 - Present
Master of Computer Applications (M.C.A), Bangalore, India	May '06 - Jul '09
